Identification of certified type

Type: Global Vision

Fuel dispensers for Motor Vehicles, model "Global Vision" with a Q<sub>max</sub> of 40, 70,

90, or 130 L/min.

In case of blending the  $Q_{max}$  is 40 L/min.

Further characteristics see page 3 and 4.

NMi Certin B.V.

Hugo de Grootplein 1, 3314 EG Dordrecht P.O. Box 394, 3300 AJ Dordrecht, NL phone +31 78 6332332 fax +31 78 6332309 certin@nmi.nl www.nmi.nl

Parties concerned can lodge objection against this decision, within six weeks after the date of submission, to the general manager of NMi B.V. (see "Regulation objection and appeal against decisions of NMi B.V.")

NMi Certin B.V., chamber o.c. nr. 27.233.418

This document is issued under the provision that no responsibility is accepted and that the applicant gives warranty for each responsibility against third parties.

OIML Certificate N° R117/1995-NL1-08.02

Project number 802372 Page 2 of 5

## OIML Member state The Netherlands

This Certificate attests the conformity of the above identified type with the requirements of the following Recommendation of the International Organization of Legal Metrology (OIML):

R117 Edition 1995 for accuracy class (0,5). **R118** Edition 1995

This Certificate relates only to the metrological and technical characteristics of the type of instrument covered by the relevant OIML Recommendation identified above.

This Certificate does not bestow any form of legal international approval.

The conformity was established by the results of tests and examinations provided in the references of the Swedish National Testing and Research Institute, SP:

- N°: MTvP604682 A (as mentioned in the EC Type Examination No. 107021, based on MID 2004-22-EC Annex B paragraph 5.1)
- N°: MTvP600658 B (OIML R117 Edition 1995 and R118 Edition 1995 Testreport (Accuracy, MMO, Flow interruption, Endurance test etc.)
- N°: MTvF204493 (Pattern evaluation report and check list)
- N°: 98V21416 D , Type designation SU 922-22 and SU 945-45 (MMQ-, Cold-, Endurance- and shortened Accuracy tests);
- N°: 99V21784 Type designation SU 734-32 40/40-60 (Accuracy-, MMQ-, Cold-, and Gas separator tests, as well as Flow interruption);
- N°: 99V21790 Type designation SU 511-21 130 (Shortened Accuracy- and MMQ test as well as Flow interruption;
- N°: MTvP103575A Type designation Global Century Single 100 (Accuracy- and Gas separator tests);
- N°: MVvF018718 Type designation SU 933-33 (Accuracy-, Endurance-, shortened Accuracy-, MMQ- and Cold tests as well as Flow interruption;
- N°: KMp I-1003 (Hoses);
- N°: MVvF014459 A (Simulated tests on the Calculating/Indicating device);
- N°: MTvP302760 A (Simulated tests on the Calculating/Indicating device);
- N°: MVvF014459 D (Simulated tests on the Calculating/Indicating device);
- N°: MTvP302760 B (Simulated tests on the Calculating/Indicating device);

The components of the "Global Vision" dispenser are exactly the same as fitted in the "Global Vista" dispenser, written in the OIML Certificate Of Conformity No. R117/1995-NL1-05-04, dated 5 June 2007, only the <u>housing</u> is different. Therefore the new dispenser(housing) has the new type "Global Vision".

Ing. C. Oosterman

Manager Product Certification

21 March 2008

### OIML Certificate N° R117/1995-NL1-08.02

Project number 802372 Page 3 of 5

Characteristics: Fuel dispensers for Motor Vehicles, model "Global Vision":

with one "CPU" Gas Elimination Device and one Dresser Wayne AB "iMeter" or "Xflo™" Measurement Transducer:

Maximum flowrate L/min	Minimum flowrate L/min	Accuracy class	Minimum measured quantity L	Liquid	Maximum volume indication L	Maximum unit price EURO/L	Maximum price to pay EURO/L
70	4	0.5	2	gasoline/ gasoil	999.99	9.999	9999.99

with one "CPU" Gas Elimination Device and one Dresser Wayne AB "iMeter" or "Xflo™" Measurement Transducer:

Maximum flowrate Umin	Minimum flowrate L/min	Accuracy class	Minimum measured quantity L	Liquid	Maximum volume indication L	Maximum unit price EURO/L	Maximum price to pay EURO/L
40 <sup>*</sup>	4	0.5	2	gasoline/ gasoil	999.99	9.999	9999.99

<sup>\*</sup> The gas separator of this measuring system is suitable for use with two measurement transducers

with two "CPU" Gas Elimination Devices and two Dresser Wayne AB "iMeter" or "Xflo™" Measurement Transducers:

Maximum flowrate L/min	Minimum flowrate L/min	Accuracy class	Minimum measured quantity L	Liquid	Maximum volume indication L	Maximum unit price EURO/L	Maximum price to pay EURO/L
130**	13	0.5	2	gasoil	999.99	9.999	9999.99

<sup>\*\*</sup> A Qmax of 90 L/min can be reached by connecting two measurement transducers in parallel with delivery via one hose with nozzle. This configuration doesnot allow a delivery from two nozzles simultaneously at 130 L/min (except when the remote pump is used).

#### OIML Certificate N° R117/1995-NL1-08.02

Project number 802372 Page 5 of 5

Comprising of: one or more measuring systems in the same housing.

Each measuring system consists of:

- One Dresser Wayne AB, "CPU" (Compact Pumping Unit) combined pump and gas eliminator device;
- One Dresser Wayne AB, "iMeter" or "XFlo™ measurement transducer
- One Dresser Wayne AB, "iGEM" calculating/indicating device.

One CPU combined pump and gas eliminator can be connected with two measurement transducers, each measuring transducer is considered as a part of a measuring system.

When more than one measuring system in one housing the iGEM calculating/indicating device may be a common part of the measuring systems.

A  $Q_{\text{max}}$  of 130 L/min can be reached by connecting two gas separators and two measurement transducers in parallel with delivery via one hose with nozzle.

For multi-product dispensers it is only possible to deliver one product at the same time on one side of the dispenser.
