Foreword

The International Organization of Legal Metrology (OIML) is a worldwide, intergovernmental organization whose primary aim is to harmonize the regulations and metrological controls applied by the national metrological services, or related organizations, of its Member States.

The main categories of OIML publications are:

- **International Recommendations (OIML R)**, which are model regulations that establish the metrological characteristics required of certain measuring instruments and which specify methods and equipment for checking their conformity. OIML Member States shall implement these Recommendations to the greatest possible extent;
- **International Documents (OIML D)**, which are informative in nature and which are intended to harmonize and improve work in the field of legal metrology;
- **International Guides (OIML G)**, which are also informative in nature and which are intended to give guidelines for the application of certain requirements to legal metrology; and
- **International Basic Publications (OIML B)**, which define the operating rules of the various OIML structures and systems.

OIML Draft Recommendations, Documents and Guides are developed by Technical Committees or Subcommittees which comprise representatives from the Member States. Certain international and regional institutions also participate on a consultation basis.

Cooperative agreements have been established between the OIML and certain institutions, such as ISO and the IEC, with the objective of avoiding contradictory requirements. Consequently, manufacturers and users of measuring instruments, test laboratories, etc. may simultaneously apply OIML publications and those of other institutions.

International Recommendations, Documents, Guides and Basic Publications are published in English (E) and translated into French (F) and are subject to periodic revision. Additionally, the OIML publishes or participates in the publication of **Vocabularies (OIML V)** and periodically commissions legal metrology experts to write **Expert Reports (OIML E)**. Expert Reports are intended to provide information and advice, and are written solely from the viewpoint of their author, without the involvement of a Technical Committee or Subcommittee, nor that of the CIML. Thus, they do not necessarily represent the views of the OIML.

This publication - reference OIML R 99-3, Edition 2008 - was developed by Technical Subcommittee TC 16/SC 1 *Air pollution*. It was approved for final publication by the International Committee of Legal Metrology in 2008.

OIML Publications may be downloaded from the OIML web site in the form of PDF files. Additional information on OIML Publications may be obtained from the Organization's headquarters:

Bureau International de Métrologie Légale

Instruments for measuring vehicle exhaust emissions

Part 3 - Report Format for Type Evaluation

1 Introduction

All references in this Report Format are to OIML R 99-1 & 2:2008. This Report Format applies for any kind of instrument for measuring vehicle exhaust emissions (independent of its technology). It presents a standardized format for the results of the various tests and examinations, described in Part 2 of OIML R 99-1 & 2:2008, to which a type of an instrument for measuring vehicle exhaust emissions shall be submitted with a view to its approval based this OIML Recommendation.

It is recommended that all metrology services or laboratories evaluating and/or testing types of instruments for measuring vehicle exhaust emissions according to OIML R 99-1 & 2:2008, or to national or regional regulations based on Part 1 of R 99-1 & 2:2008, use this Report Format, directly or after translation into a language other than English or French. In case of a translation, it is highly recommended to leave the structure and the numbers of the clauses unchanged: in this case most of the contents is also understandable for those who can not read the language of the translation.

It is also recommended that this Report Format in English or in French (or in both languages) be transmitted by the country performing the tests to the relevant authorities of another country, when requested for issuing a national or regional type approval.

In the practical application of the Report Format, in addition to a cover page by the Issuing Authority, as a minimum clauses A–F (as necessary) shall be included.

2 Applicability of this Report Format

In the framework of the *OIML Certificate System for Measuring Instruments*, and the *OIML Mutual Acceptance Arrangement (MAA)* applicable to instruments for measuring vehicle exhaust emissions in conformity with Part 1 of R 99-1 & 2:2008, use of this Report Format is mandatory, in French and/or in English with translation into the national languages of the countries issuing such Certificates, if appropriate.

Implementation of this Report Format is informative with regard to the implementation of Part 1 of OIML R 99-1 & 2 in national regulations.

3 Guidance for the application of this Report Format

Key to the symbols and expressions used on the following pages:

The “summary of the results” and the “results of the tests” shall be completed according to the following examples:

	Class 00	Class 0	Class I	No	
Passed for	x				passed for class 00
Passed for		x	x		passed for class 0 and I
Passed for				x	failed for all classes
Passed for	/	/	/	/	test is not applicable for this instrument

Unless prescribed otherwise, “Date” in the reports refers to the date of testing.

Note (1) Instead of the prescribed volume fractions in % vol, test gases with the same fractions in % mol can be used as well.

Note (2) The name(s) or symbol(s) of the unit(s) used to express the test results shall be specified in each form.

In case a prescribed test is not relevant for the type of instrument to be tested, the reason why the test is omitted shall be clearly stated in the field “Remarks” (for instance surge tests on signal lines shorter than 30 m, tests related to AC mains supply in the case of an instrument only powered by batteries, or partial testing after modification of a previously tested type).

The number of the report and the page numbers shall be completed in the heading.

Pages 1–6 of this Report Format may be replaced by a cover page by the Issuing Authority.

The user is free to change the length of the cells (for instance “Remarks”) as required in a specific case.

4 The Evaluation Report

The format for the Report is given on the following pages.

Cover page by the Issuing Authority

Contents of the Report

A	Authority responsible for this Report.....	10
B	Synopsis of the results of the examinations and tests	10
C	Summary of the results of the examination and tests.....	11
C.1	Examinations.....	11
C.2	Performance tests	12
D	General information	13
D.1	Manufacturer.....	13
D.2	Applicant.....	13
D.3	Testing laboratories involved in the tests.....	14
D.4	General information concerning the type.....	15
D.5	Accessories supplied by the applicant	16
D.6	Selection of sample(s) tested	16
D.7	Adjustments and modifications.....	17
D.8	Additional information concerning the type	17
D.9	Documentation supplied by the applicant.....	18
D.10	Information concerning the test equipment used for the type evaluation	18
E	Examination	19
E.1	Indication, measuring range, units and resolution (5.1, 5.2, 5.3).....	19
E.2	Durable recording of results (5.4).....	19
E.3	Lambda calculation (5.11)	20
E.4	Materials used (6.1.1)	20
E.5	Size of sampling probe (6.1.2).....	21
E.6	Filter (6.1.3.1)	21
E.7	Water separator (6.1.4.2)	22
E.8	Port for ambient air / Charcoal filter (6.1.5)	22
E.9	Pump (6.1.6).....	23
E.10	Interface (6.1.9).....	23
E.11	Adjustment facilities (6.2.1, 6.2.2).....	24
E.12	Cross-influence of adjustments (6.2.3)	24
E.13	Negative indications (6.2.4).....	25
E.14	Disturbances / checking facilities (6.3.1, -2, -3, -4, -5).....	25
E.15	Measurements when not adjusted (6.3.6, 6.3.7, 6.3.8).....	26
E.16	Sealing (6.3.9).....	26
E.17	Software (6.3.10)	27
E.18	Influence by remote devices (6.3.11).....	27
E.19	Operating instructions (7.2)	28
E.20	Documentation for type approval (8.1.1).....	29
F	Performance tests	30
F.1	Error curve (9.1, A.2)	30
F.2	Stability with time or drift (9.2, A.3).....	31
F.3	Repeatability (9.3, A.4)	32
F.4	Dry heat (40 °C) (9.4.1.a, A.5).....	33
F.5	Cold (5 °C) (9.4.1.b A.6).....	34
F.6	Damp heat, steady state (30 °C, 85 % R.H.) (9.4.1.c, A.7)	35
F.7	Atmospheric pressure (9.4.1.d, A.8).....	36
F.8	Voltage and frequency variations (9.4.1.e, A.9).....	37
F.9	Cross sensitivity (9.4.2, A.10).....	38
F.10	Mechanical shock (free fall, 9.5.a, A.11.1)	40
F.11	Vibrations (9.5.a, A.11.2).....	41

F.12	AC voltage dips, short interruptions and voltage variations (9.5.b, A.12)	42
F.13	Voltage bursts (9.5.c, A.13)	43
F.14	Transient conduction (road vehicle battery: 9.5.d, A.14)	45
F.15	Electrostatic discharge (9.5.e, A.15)	46
F.17	Radio frequency immunity (9.5.g, A.17)	53
F.18	Mains frequency magnetic fields (9.5.h, A.18)	55
F.19	Warm-up time (9.6.a, A.19)	56
F.20	Response time (9.6.b, A.20)	57
F.21	Low flow (9.5.2.c, A.21)	58
F.22	Leakage (9.6.d, A.22)	59
F.23	HC residue (9.6.e, A.23)	60
F.24	Filter unit (9.6.f, A.24)	61
F.25	Water separator (9.6.g, A.25)	62
F.26	Propane/Hexane factor (PEF) (9.6.h A.26)	64

A Authority responsible for this Report

Name	
Address	
Report number	
Application number	
Period of tests	
Date of issuing this Report	
Name and signature of the person responsible	
Stamp(s) (if applicable)	

B Synopsis of the results of the examinations and tests

(To be completed by the Issuing Authority)

The tested specimen fulfils ALL the applicable requirements in OIML R 99-1 & 2:2008 Part 1 for:			
<input type="checkbox"/> Class 00	<input type="checkbox"/> Class 0	<input type="checkbox"/> Class I	<input type="checkbox"/> No
Remarks:			

C Summary of the results of the examination and tests

(To be completed by the Issuing Authority)

C.1 Examinations

(Refer to clauses in R 99-1 & 2)

For details, refer to the examination: clause E of this Report as indicated in the last column.

Clause(s)	General requirements	Complies		details in
		Yes	No	
5.1	Indication of the measured result			E.1
5.2	Measuring range			E.1
5.3	Resolution of indication			E.1
5.4	Durable recording of measuring results			E.2
5.11	Lambda calculation			E.3
6.1.1	Materials			E.4
6.1.2	Sampling probe			E.5
6.1.3.1	Filter			E.6
6.1.4.2	Water separator			E.7
6.1.5	Ambient air / Charcoal filter			E.8
6.1.6	Pump			E.9
6.1.9	Interface / Data printer			E.10
6.2.1, -2	Adjustment facilities			E.11
6.2.3	Cross-influence of adjustment			E.12
6.2.4	Negative indications			E.13
6.3.1, -2, -3, -4, -5	Checking facilities			E.14
6.3.6, -7, -8	No measurements when not adjusted			E.15
6.3.9	Sealing			E.16
6.3.10	Software			E.17
6.3.11	No influence by remote devices			E.18
7.1	Inscriptions			D.4
7.2	Operating instructions			E.19
8.1.1	Documentation for the type approval			E.20

C.2 Performance tests*(Refer to Annex A of OIML R 99-1 & 2)*

For details, refer to the tests: clause F of this Report as indicated in the last column.

Clause	Performance tests	Complies				Details in
		Class 00	Class 0	Class I	No	
A.2	Error curve					F.1
A.3	Stability with time or drift					F.2
A.4	Repeatability					F.3
A.5	Dry heat					F.4
A.6	Cold					F.5
A.7	Damp heat, steady state					F.6
A.8	Atmospheric pressure					F.7
A.9	Voltage and frequency variation					F.8
A.10	Cross sensitivity					F.9
A.11	Mechanical shock					F.10
A.11	Vibrations					F.11
A.12	AC voltage dips, short interruptions and voltage variations					F.12
A.13	Burst (transients)					F.13
A.14	Electrical transient conduction (road vehicle battery)					F.14
A.15	Electrostatic discharge					F.15
A.16	Surges on data, control and power lines					F.16
A.17	Radio frequency immunity					F.17
A.18	Mains frequency magnetic fields					F.18
A.19	Warm-up time					F.19
A.20	Response time					F.20
A.21	Low flow					F.21
A.22	Leakage					F.22
A.23	HC residue					F.23
A.24	Filter unit					F.24
A.25	Water separator					F.25
A.26	Propane/hexane equivalency factor (PEF)					F.26

Date of signature			
Stamp (if applicable) and signature of the person responsible			

Remarks:

--

D.4 General information concerning the type
and the sample(s) supplied for the tests
(as stated on the instrument / provided by the manufacturer)

Information indicated on the instrument (ref. R 99-1 & 2 Part 1, 7.1)			
Manufacturer's trade mark			
Year of manufacture			
Accuracy class			
Type designation			
Model number (if applicable)			
Serial number(s) of the sample(s)			
Instrument is pressure compensated		<input type="checkbox"/> Yes	<input type="checkbox"/> No
Type description of the <u>main</u> transducer			
Serial number of the <u>measuring</u> transducer			
Type of the oxygen fuel cell			
Type(s) of other oxygen fuel cell(s)			
Serial number of the oxygen fuel cell			
Minimum flowrate			
Nominal flowrate			
Electrical power			
Propane/hexane equivalency factor	single value		
	200 ppm vol C ₃ H ₈		
	2 000 ppm vol C ₃ H ₈		
	4 000 ppm vol C ₃ H ₈		
Identification of software	Version number		
	Checksum/identification code		
CO	Maximum measured value:	% vol	Resolution of indication: % vol
CO ₂	Maximum measured value:	% vol	Resolution of indication: % vol
HC	Maximum measured value:	ppm vol	Resolution of indication: ppm vol
O ₂	Maximum measured value:	% vol	Resolution of indication: % vol

Remarks:

D.7 Adjustments and modifications

Adjustments, modifications, and repairs made to the samples during the testing:

D.8 Additional information concerning the type

Additional remarks and/or information (connection equipment, interfaces, etc.):

D.9 Documentation supplied by the applicant

See E.20

Remarks:

D.10 Information concerning the test equipment used for the type evaluation
(including details of simulations)

If applicable, the laboratory is free to provide this information, instead of a complete overview here, in the appropriate chapter F.x in an extra field below the 1st table (with “Date & Time”, etc.). In this case a statement shall be made in this field.

E Examination

(To be completed by the Examining Authority)

E.1 Indication, measuring range, units and resolution (5.1, 5.2, 5.3)

Date:	Observer:	Serial number:
--------------	------------------	-----------------------

Simultaneous indication of the gas components (5.1): Yes No

	Indication (5.1)	Measuring range (5.2)	Resolution (5.3)	
CO		% vol	% vol	
CO ₂		% vol	% vol	
O ₂		% vol	O ₂ ≤ 4 % vol	% vol
			O ₂ > 4 % vol	% vol
HC		ppm vol	ppm vol	

Remarks:

Passed for	Class 00	Class 0	Class I	No

E.2 Durable recording of results (5.4)

Date:	Observer:	Serial number:
--------------	------------------	-----------------------

The instrument is provided with:	Internal	External	No
printing device			
memory device			

Printer fulfils requirements	Yes	No
a) Clarity of print		
b) Resolution		
c) Size of figures		
d) Printed units		

e) Data transmission for external printer: See E.10

Remarks:

Passed for	Class 00	Class 0	Class I	No

E.3 Lambda calculation (5.11)

Date:	Observer:	Serial number:
-------	-----------	----------------

	Yes	No
The instrument is provided with a lambda calculation		
Formula for lambda calculation as in Annex D of OIML R 99-1 & 2		
Maximum permissible error in the lambda calculation according to 5.11		
Indication of the lambda value according to 5.11		
Other applied formula:		
Remarks		

Passed for	Class 00	Class 0	Class I	No

E.4 Materials used (6.1.1)

Date:	Observer:	Serial number:
-------	-----------	----------------

	Fulfil requirements	
	Yes	No
Gas handling system		
Sampling probe		
Risk of influence on gas samples		
Pipe		
Remarks:		

Passed for	Class 00	Class 0	Class I	No

E.5 Size of sampling probe (6.1.2)

Date:	Observer:	Serial number:
-------	-----------	----------------

		Fulfil requirements	
		Yes	No
Length of probe:	cm		
Retaining device			
Remarks:			

Passed for	Class 00	Class 0	Class I	No

E.6 Filter (6.1.3.1)

Date:	Observer:	Serial number:
-------	-----------	----------------

		Fulfil requirements	
		Yes	No
Size of filter (particles)	µm		
Contamination observable			
Replaceable without special tools			
Remarks:			

Passed for	Class 00	Class 0	Class I	No

E.7 Water separator (6.1.4.2)

Date:	Observer:	Serial number:
-------	-----------	----------------

Requirement	Fulfil requirements	
	Yes	No
The instrument has a water separator		
Empties automatically in case of saturation		
Measurement operation automatically stopped in case of saturation		
Remarks:		

Passed for	Class 00	Class 0	Class I	No

E.8 Port for ambient air / Charcoal filter (6.1.5)

Date:	Observer:	Serial number:
-------	-----------	----------------

	Present				Fulfil requirements	
	Yes	No	Upstream	Downstream	Yes	No
HC channel						
Port for ambient air						
Charcoal filter						
Port for reference gas						
Means to maintain pressure						
Remarks:						

Passed for	Class 00	Class 0	Class I	No

E.9 Pump (6.1.6)

Date:	Observer:	Serial number:
-------	-----------	----------------

	Fulfil requirements	
	Yes	No
Effect of vibrations on measurements		
Possible to turn on/off separately		
Possible to make a measurement when pump is off		
Automatic flush with ambient air before pump is switched off <i>(not mandatory)</i>		
Remarks:		

Passed for	Class 00	Class 0	Class I	No

E.10 Interface (6.1.9)

Date:	Observer:	Serial number:
-------	-----------	----------------

	Present		Fulfil requirements	
	Yes	No	Yes	No
Interface				
Printer <i>(see also E.2)</i>				
Other data storage				
Description of data storage:				
Remarks:				

Passed for	Class 00	Class 0	Class I	No

E.11 Adjustment facilities (6.2.1, 6.2.2)

Date:	Observer:	Serial number:
-------	-----------	----------------

Adjustment facilities	Requirement (*)	Actual (*)			
		No	M	SA	A
Zero-setting	A				
Gas calibration	M, SA, or A				
Internal adjustment	A				
(*) M = Manual, SA = Semi-automatic and A = Automatic					
Remarks:					

Passed for	Class 00	Class 0	Class I	No

E.12 Cross-influence of adjustments (6.2.3)

Date:	Observer:	Serial number:
-------	-----------	----------------

Any cross-influence found	Yes	No
If "Yes", give details here:		
Remarks:		

Passed for	Class 00	Class 0	Class I	No

E.13 Negative indications (6.2.4)

Date:	Observer:	Serial number:
-------	-----------	----------------

Negative indication down to	
Remarks:	

Passed for	Class 00	Class 0	Class I	No

E.14 Disturbances / checking facilities (6.3.1, -2, -3, -4, -5)

Occurrence of significant faults (6.3.1): for test results, please refer to F.11 - F.18)

Date:	Observer:	Serial number:
-------	-----------	----------------

		Present		Function ⁽¹⁾	
		Yes	No	P	I
Checking <i>facilities</i> present	(6.3.1)				
Possibility to check the <i>facilities</i>	(6.3.1)				
Checking facility HC residue	(6.3.2, -3)				
Automatic recognition of <i>malfunctioning of</i> O ₂ sensor	(6.3.4)				
Warm-up check	(6.3.5, a)				
Low flow check	(6.3.5, b)				
HC residue check	(6.3.5, c)				
Internal reference adjustment check	(6.3.5, d)				
Gas adj. check (6.3.5, e)	Time interval: month				
Leak check ⁽²⁾ (6.3.5, f)	Time interval: h				

⁽¹⁾ P = permanent automatic, I = Intermittent automatic

⁽²⁾ For test results of leak check, refer to F.22

Remarks:					
----------	--	--	--	--	--

Passed for	Class 00	Class 0	Class I	No

E.15 Measurements when not adjusted (6.3.6, 6.3.7, 6.3.8)

Date:	Observer:	Serial number:
-------	-----------	----------------

Adjustment facility	Automatic	Semi automatic

Adjustment facility	Possibility / warning		Meets requirement	
	Yes	No	Yes	No
Possibility to make a measurement when adjustment is not completed (6.3.6)				
Possibility to make a measurement when adjustment is required (6.3.7)				
Warning for required adjustment (6.3.8)				
Remarks:				

Passed for	Class 00	Class 0	Class I	No

E.16 Sealing (6.3.9)

Date:	Observer:	Serial number:
-------	-----------	----------------

Effective sealing / other protection of:	Yes	No
Adjustment means		
Software integrity		
Disposable oxygen fuel cell		
Others:		
Remarks:		

Passed for	Class 00	Class 0	Class I	No

E.17 Software (6.3.10)

Date:	Observer:	Serial number:
Version of software:		Identification code:

	Yes	No
Software protected by sealing		
Automatic change of identification code		
Fixed version number		

Remarks:

Passed for	Class 00	Class 0	Class I	No

E.18 Influence by remote devices (6.3.11)

Date:	Observer:	Serial number:
-------	-----------	----------------

	Yes	No
Possible influence by remote devices		

Remarks:

Passed for	Class 00	Class 0	Class I	No

E.19 Operating instructions (7.2)

Date:		Observer:
Language(s):		
Version:		

	Yes	No	N/A	Remarks
Operating instructions available (7.2.1)				
Time intervals for adjustment (7.2.2.a)				
Adjustment procedures (7.2.2.a)				
Time intervals for maintenance (7.2.2.a)				
Maintenance procedures (7.2.2.a)				
Time interval of leak test (7.2.2.a)				
Leakage test procedure (7.2.2.b)				
HC-residue check instruction (7.2.2.c)				
Storage temperature (7.2.2.d)				
Specifications of portable generator (7.2.2.e)				
Rated operating conditions, etc. (7.2.2.f)				
Formula of lambda calculation (7.2.2.g)				
Replacement of oxygen fuel cell (7.2.2.h)				
External power converter (7.2.2.i)				
Compatibility ancillary equipment (7.2.2.j)				
Temperature range (7.2.2.k)				
Specific conditions (7.2.2.l)				<i>Give details below in "remarks"</i>
Specifications of battery (7.2.2.m)				

Remarks:

Passed for	Class 00	Class 0	Class I	No

F Performance tests

F.1 Error curve (9.1, A.2)

Serial no.:	Instrument:	Transducer:	O ₂ fuel cell:	

Test gas D	% vol CO	% vol CO ₂	ppm vol HC	ppm vol C ₃ H ₈	% vol O ₂
Recommended	0.5	14	1 000		0
Actual					

F.25.1 High temperature (40 °C) with wet gas: water saturated N₂ / ambient air (A.25.1)

Temperature: °C	Indication			
	% vol CO	% vol CO ₂	ppm vol HC	% vol O ₂
Test gas				
30 minutes wet gas				
Test gas				
Error				
MPE				

Response time after 30 min wet gas:

	Indicated / calculated value (oxygen-free gas)			
	% vol CO	% vol CO ₂	ppm vol HC	% vol O ₂
Air				
Final value				
95 % of final value				N/A
Final value + 0.1 %	N/A	N/A	N/A	

	Time after switch from air to test gas			
	CO	CO ₂	HC	O ₂
Time until 95 % of final value				N/A
Time until final value + 0.1 %	N/A	N/A	N/A	

Remarks:

Passed for	Class 00	Class 0	Class I	No

F.25.2 Low ambient temperature with exhaust gas (A.25.2)

Temperature: °C	Indication			
	% vol CO	% vol CO ₂	ppm vol HC	% vol O ₂
Test gas				
30 minutes exhaust gas				
Test gas				
Error				
MPE				

Response time after 30 min wet gas:

	indicated / calculated value (oxygen-free gas)			
	% vol CO	% vol CO ₂	ppm vol HC	% vol O ₂
Air				
Final value				
95 % of final value				N/A
Final value + 0.1 %	N/A	N/A	N/A	

	Time after switch from air to test gas			
	CO	CO ₂	HC	O ₂
Time until 95 % of final value				N/A
Time until final value + 0.1 %	N/A	N/A	N/A	

Remarks:

Passed for	Class 00	Class 0	Class I	No

F.26 Propane/Hexane factor (PEF) (9.6.h A.26)

Date & Time	Start:	Observer:			
	Finish:	PEF:			
Ambient temperature:	°C	Ambient pressure:	hPa	Relative humidity:	%
Serial no.:	Instrument:	Transducer:	O ₂ fuel cell:		

Test gas	ppm vol propane ^(a)		ppm vol n-hexane ^(c)	
Recommended	200	2 000	100	1 000
Actual				
Actual as HC ^(b)				
Indication as HC				
Error (HC) ^{(b) + (d)}				
MPE ^(*)				
1/2 MPE ^(*)				
Difference errors ^(e)	200 ppm propane / 100 ppm vol n-hexane			
	2 000 ppm propane / 1 000 ppm vol n-hexane			
Formula for the calculation of PEF:				
Calculated PEF for high concentration:				
Calculated PEF for low concentration:				
Calculated mean value of PEF				
Notes: ^(a) , ^(b) , ^(c) , ^(d) , and ^(e) refer to steps in A.26 ^(*) whatever is applicable				
Remarks:				

Passed for	Class 00	Class 0	Class I	No
