

Capability Annex

OIML R 60:2000

	Class A	Class B	Class C	Class D
Minimum load D_{min} (kg)				
Maximum load D_{max} (kg)				
Maximum number of load cell verification intervals n_{max}				
Minimum load cell verification interval v_{min}				
Type of loads to be tested	Tension Beam (shear) Universal		Compression Beam (bending)	
Type of tests related to humidity effects	Damp heat, steady state		Damp heat, cyclic test	
Range for temperature effects	Lower limit: °C Upper limit: °C			

Restrictions:
