

## Capability Annex

### OIML R 60:2000

	Class A	Class B	Class C	Class D
Minimum load $D_{min}$ (kg)				
Maximum load $D_{max}$ (kg)				
Maximum number of load cell verification intervals $n_{max}$				
Minimum load cell verification interval $v_{min}$				
Type of loads to be tested	Tension  Beam (shear)  Universal		Compression  Beam (bending)	
Type of tests related to humidity effects	Damp heat, steady state		Damp heat, cyclic test	
Range for temperature effects	Lower limit:    °C  Upper limit:    °C			

Restrictions:
