

**49th CIML Meeting**

**Agenda item 8.1 – Additional supporting information**

**Status of OIML Project Groups  
(Addendum)**

22 October 2014

After the publication of the information on the status of OIML project groups as “last minute” document no. 6 for the CIML meeting, the BIML received updates for the following projects from the respective conveners:

**TC 3/SC 4/ p 1: Surveillance of utility meters in service on the basis of sampling inspections**

On 3 June 2014 a 4CD was sent to the P- and O-members and organizations in liaison with OIML TC 3/SC 4/p 1. The deadline for the vote (P-members only) was 3 September 2014. The voting result is that the project group has approved the 4CD. This means it can now be submitted for preliminary ballot to the CIML. In a next step the final text and a collation of all comments received with the convener's responses will be sent to the BIML.

**TC 9/SC 4/p 3: New Document: Hierarchy scheme for density-measuring instruments**

This new document has been already prepared in Russian. After translation in English the 1st CD will be circulated for comments (Nov, 2014).

**TC 11/SC 3/p 5: Revision of R 18: Visual disappearing filament pyrometers**

Such pyrometers are obsolete and are no longer in use in most countries. The further fate of this recommendation will be surveyed among the project participants in order to obtain consensus on its withdrawal (Nov., 2014).

**TC 17/SC 5/p1 New Recommendation: Reference standard liquids (Newtonian viscosity standard for the calibration and verification of viscometers)**

This new recommendation is being prepared. Its WD is expected to be completed in December of 2014 and hopefully will be circulated for comments before the end of this year.
