16 September 2014

Dear p-and o-members of OIML TC 9/SC 2/p8, liaisons and experts,

The 3CD of OIML R61 Part 1 (*Metrological and technical requirements*) and Part 2 (*Metrological controls and performance tests*) is now available at the TC9/SC2 web link below for your comments to help improve the draft.

The 3CD incorporates comments received to the 2 CD consultations which closed in April 2014 and includes the following amendments:

1. The 3CD is now aligned with the standard format required in OIML B 6-2, so that the 'terminology' is placed after 'scope'.
2. The Influence factor and Disturbance test have been updated with information from the 2013 OIML D11 tables provided by The Netherlands.
3. The informative Annex E has been supplemented with information taken from Part 3 of the WELMEC Guide 2.8. Thus providing information on how to apply the modular approach in R76 in cases where a lot of modules to be used in filling instruments (indicators or analogue data processing units) have got certificates issued under R76.

Due to the substantial editorial amendments No voting is recommended. Please review the 3CD and provide comments only. A ballot will be held on the 4CD.

Please return your comments to the 3CD to the Secretariat at morayo.awosola@nmo.gov.uk by the 30th December 2014.

Feel free to contact me if you need further information regarding this project.

All information and forms are publicly available at the TC/SC website link:
